

BOARD ROOM RADIO BROADCAST 2011 ACTIVITIES OUTLOOK

1 February 2011

Australian Pacific Coal ASX: AQC

Australian Pacific Coal (AQC) is an emerging ASX coal explorer focused on the Bowen Basin, Queensland.

Through a series of acquisitions, AQC has positioned itself with both metallurgical and thermal coal projects potentially suited for underground and open cut mining.

The projects are located close to the existing network of rail and port infrastructure in the Bowen Basin.

The Company ultimately seeks to be a coal miner in its own right, or to value add these projects for joint venture or divestment.

The Cooroorah Project has an inferred resource of 107 million tonnes of potential metallurgical coal. It is well located between Macarthur's Stanwell project and Jellinbah Mine. The Mt Hillalong project shows scope to prove a similar scaled coal resource.

AUSTRALIAN PACIFIC COAL LIMITED (ASX: AQC) provides the opportunity to listen to an audio broadcast **with Mr Paul Byrne, Executive Director** in a presentation titled "**Australian Pacific Coal 2011 Activities Outlook - Paul Byrne, CEO**".

To listen, copy the following details into your web browser:
